

FLEXI BED

Motorised mobile bed frame

This motorised frame is not just an aid, but a real game-changer in the care and assistance of individuals confined to bed for long periods. Designed for ergonomic use, FLEXI BED is the everyday ally for those seeking a balance between functionality, comfort and human proximity, while also providing additional safety thanks to its easily adjustable side rails.

FLEXI BED 2 and FLEXI BED 4: both models share a design that emphasises comfort and safety, with technical specifications that meet the need for compact dimensions and customised adjustments (head-foot and lateral movement).

With FLEXI BED, you bring innovation into your most personal space, improving the quality of care.

Optimise daily care with FLEXI BED: integrate it into your double bed and facilitate every assistive gesture.

VERSATILITY

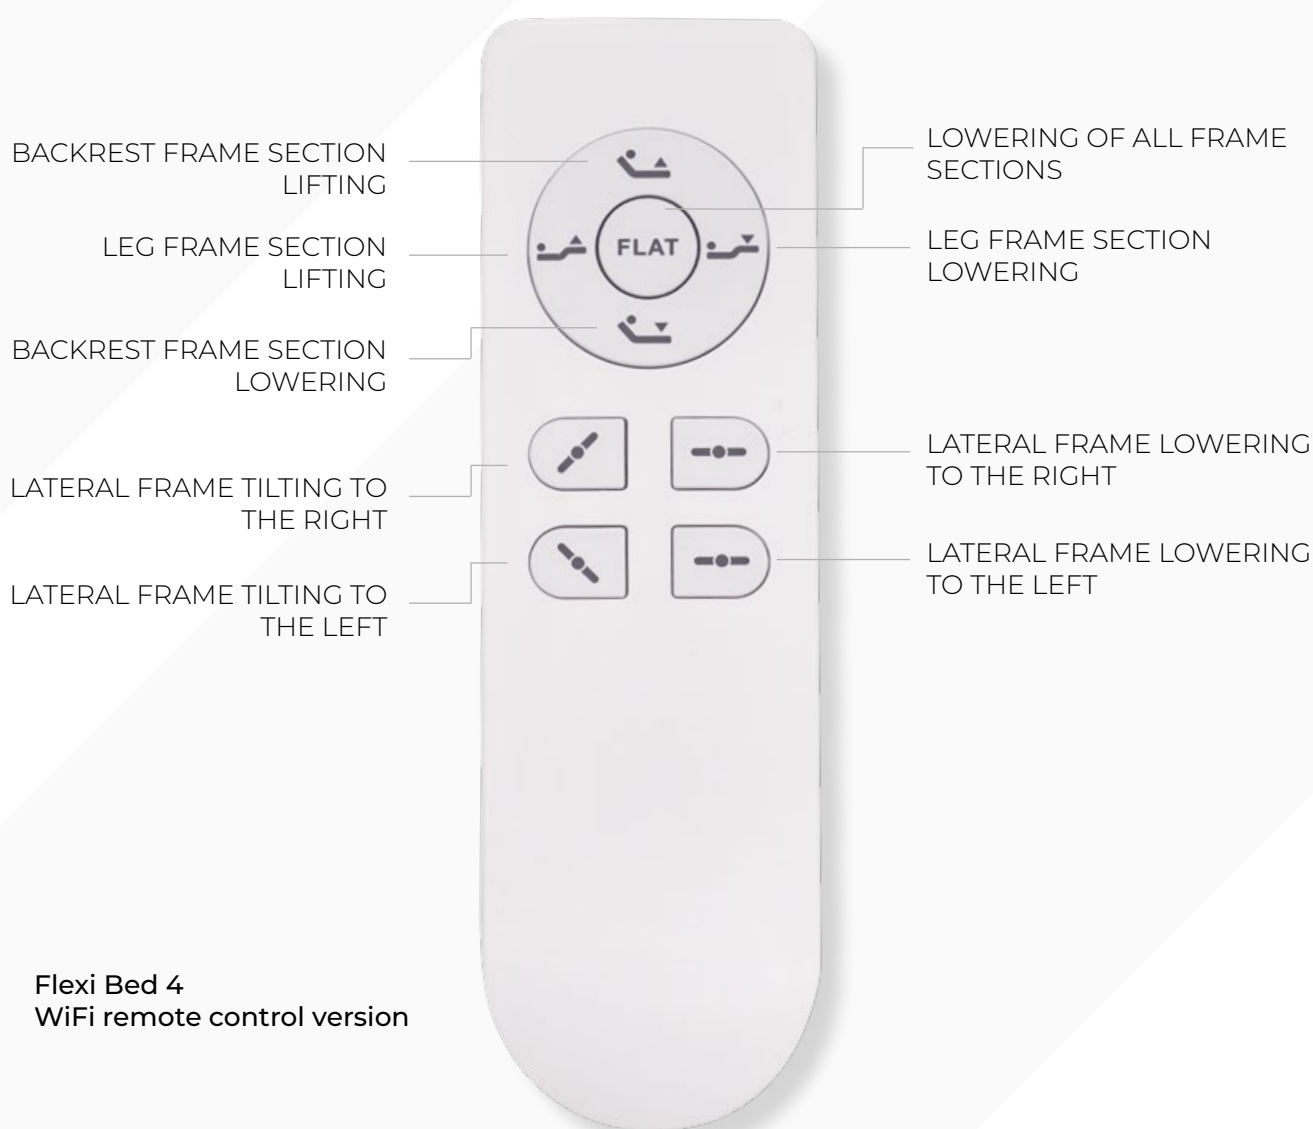

Ideal both for patients who require frequent position changes and for those who require constant assistance.

ERGONOMICS AND COMFORT

The motorised movement of the bed sections allows a variety of positions, from lying to sitting, increasing patient comfort and simplifying caregiver activities.

SAFETY

Equipped with restraint systems and side rails adjustable at the touch of a button, it ensures maximum patient safety during use.

Flexi Bed 4
WiFi remote control version

DISCOVER TRANSFORMATIVE COMFORT WITH FLEXI BED

Explore customised wellness with FLEXI BED, where every adjustment is a step towards comfort. Lift your head to eat or relax, elevate your feet for instant relief, and use lateral mobility to simplify daily care.

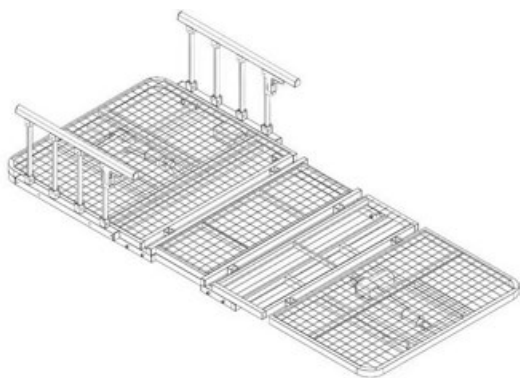

■ HEAD AND BACK LIFTING

■ LEG ADJUSTMENT

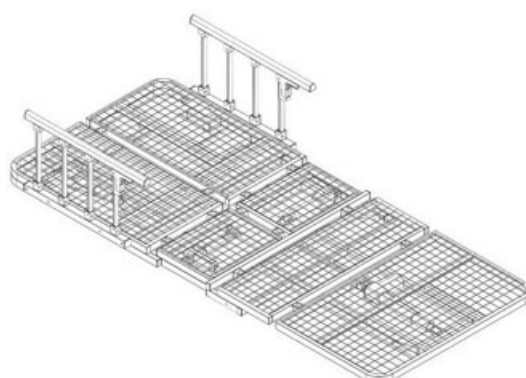

■ LATERAL MOVEMENT

FLEXI BED 2

Equipped with 2 motors, it allows efficient head and leg adjustment, effectively combining functionality and ease of use. Wired remote control.

FLEXI BED 4

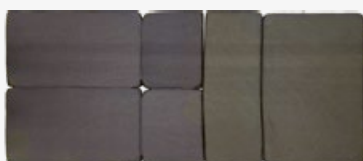

Powered by 4 motors, it allows head and leg adjustment and independent movement of the backrest sides. WiFi remote control.
