

VITTORIA ZERO G

Elevating armchair with 2 motors

The VITTORIA ZERO G relaxation armchair combines elegance and functionality for unparalleled well-being. Equipped with two independent motors, it can easily reach different positions: sitting, sitting with outstretched legs, lying down and standing. Its distinctive design incorporates the **Zero Gravity function** by raising the front 12° to position the body in an ideal condition, thus improving blood circulation and offering deep relaxation to the cardiovascular system.

■ RELAXATION POSITION

■ ROLLER SYSTEM

■ ZERO GRAVITY POSITION

The Zero Gravity function is designed to place the body in a **weightless** state by tilting the front 12°. This scientifically researched position helps reduce stress on the spine and joints, improving blood circulation and promoting deep relaxation. It is ideal for those who want relaxing experiences that combine advanced comfort and health benefits.

■ REMOVABLE SIDE HEADRESTS

■ REMOVABLE ARMRESTS

Roller system (standard): This is a practical lifting mechanism on four independent wheels operated by a foot lever at the rear: a functional and practical system that allows the armchair to be easily transported from one room to another.

Seat lift function (standard): the seat lift mechanism raises the chair vertically by up to 10 cm, making it easier for those with mobility difficulties to get in and out of the chair, and allows the chair to open up to 180°.

Armchair cover (optional): cover for the armchair in the same colour as the relaxation armchairs to protect the areas most subject to wear and tear.
